What makes CWD an enterprise architecture rather than a simple chatbot?

This is sample content. Replace this file with your own document, keeping the same file name.

Architecture

Sample CWD architecture (replace with your diagram)

Trade-offs

Decision	Benefit	Cost	Mitigation
Async queue	Resilience	Complexity	Dead-letter queue
Cache	Lower latency	Stale data	TTL + invalidation
Persistence	Durability	Extra latency	Write-behind

Key takeaways

- Lead with the business problem
- Explain the design and the trade-offs
- Close with what you personally owned
